

Beak Chart

While we wait for birds to visit the feeder, draw a chart like the one below in your nature journal to record your observations of any birds visiting your feeder: what do you notice about them? Do they have small or large beaks? What colors do you notice? Take note of at least three different birds.

Describe the bird's coloring <i>in detail!</i>	Describe the bird's size	Other observations/draw the bird's beak
White tummy, gray wings, black forehead and chin with white stripe off eyes	About the size of a baseball
